

NEW

KIT-DSR-DRD for flat roof drain de-icing

Check out our new solution for protecting flat roofs from ice and snow damage. The unique KIT-DSR-DRD efficiently transfers the heat and keeps the area around the roof drain snow free. The system does not include the Delta-Therm self-regulating cable which needs to be purchased separately.

The assembly parts snap into each other, which eliminates the need for any riveting, roof penetration or complex cable layouts, thus reducing installation time in the field.

Features

- Quick and easy connection
- Lower total installation cost
- Reliable and maintenance free

Specification

Material: Aluminum

Warning

The cables with the KIT-DSR-DRD must be installed by a qualified electrician. All assembly, installation and test instructions must be followed. Improper installation can result in property damage, serious bodily injury and/or death, and a void warranty. Instructions are available at www.delta-therm.com, or call us at 1-800-526-7887 for any installation or operating questions.
